

PRIME PLUS

Glossy PPF with optimal clarity, gloss and protection

Our advanced engineering and precision manufacturing make Prime Plus an exceptionally durable and optically clear protective film. Utilizing an enhanced self-healing top-coat and a high-performance TPU base, Prime Plus offers superior resistance to scratches, stains, and environmental damage. Designed for versatility and long-lasting protection, it's the perfect choice for automotive, and industrial applications. With proven performance in demanding conditions, Prime Plus is trusted by professionals worldwide for both OEM and aftermarket installations.

Nanotek® Prime Plus is our most popular film. Perfect for installers looking for a more tacky adhesive that makes folding the edges extremely easy.

Prime Plus offers excellent self-healing and anti-yellowing properties. This soft film comes with our advanced hydrophobic top-coat technology.

FEATURES

- Soft TPU Film
- Super Gloss Finish
- High Track Adhesive
- Excellent Healing Properties
